Pehle ye 2 minute padho

Free ka matlab hamesha "bina limit" nahi hota.

Is guide mein free ka matlab: tool ka ek free plan ya free account hai. Limits (kitne messages, credits, exports) tools badalte rehte hain, isliye maine exact number tabhi likha jab tool ke apne page ne diya. Baaki jagah "limits ke saath" likha hai.

1. **Private cheez mat daalo**
   Aadhaar, OTP, password, bank detail kisi AI tool mein kabhi nahi. Free tools par bheja data tool ki company apne product behtar karne mein use kar sakti hai.

2. **Facts khud check karo**
   AI galat bhi bol deta hai. Naam, date, number aur source link khud dekho, khaaskar resume, assignment aur kisi bhi form mein.

3. **Commercial use ka rule alag hota hai**
   Free plan ka output kamai wale kaam mein hamesha allowed nahi hota. Jaise ElevenLabs ke free plan mein commercial use ki permission nahi hoti. Kamai se pehle terms padho.

4. **Limit khatam ho to ruko**
   Kai tools ki limit ek time-window mein refill hoti hai. Thodi der baad dobara try karo. Kisi tool ke pichhe paise mat lagao jab tak zaroorat na ho.

5. **Install ya signup se pehle official site**
   Tool ka naam search karke sirf official site kholo. Nakli APK ya "premium free" wale link se bacho.

Update: yahan ki jaankari 27 Oct 2026 ko check ki gayi thi. Pricing aur limits badal sakti hain. Final baat har tool ki apni site par dekho.
